## HOW IT WORKS

My Auto Solutions provides service in two ways. Locally, we have a Duluth workshop and store where customers from the Atlanta areas can bring their damaged auto parts to be rebuilt. Our excellent customer service representatives will help you understand the advantage remanufactured auto parts offer for your car and your wallet. Then, the expert technicians at the My Auto Solutions Duluth location will promptly reengineer your damaged auto part and completely test all features.

For customers outside of Georgia, or the Atlanta area, we also provide a mail-in service. Customers from across the United States can send their defective auto parts to our Duluth, Georgia store for remanufacturing. The steps necessary for our mail-in part repair process are outlined below.

### STEP 1

Carefully remove your unit from your vehicle, if you are not sure then please call the office and maybe we can help you, or take it to your local workshop.

### STEP 2

Securely pack your item, using the correct box so that your unit cannot be damaged in transit. Take special care when packing

### STEP 3

Send Your Part to us

Our Address:  
MAS - My Auto Solutions  
2005 BOGGS RD  
DULUTH, GA 30096

Include the Following:  
1. Your Name  
2. Phone Number  
3. Return Address

### STEP 4

Once we receive your unit we will inspect and repair your unit and after through testing we will call you for payment.

In 2006, My Auto Solutions was established in the Atlanta area to provide customers with low cost, automotive part rebuilding services. We save our customers money by rebuilding original parts and providing expert technical support. Our services exist as a cost effective alternative to auto dealership part repair.

The My Auto Solutions mail-in service option provides quality auto part remanufacturing. We provide service to all 50 states in USA. It is our belief that service should be focused on the customer. At My Auto Solutions, we know that waiting for a part to be fixed is frustrating. That's why all mail-in parts are repaired and mailed out within 24 hours of their arrival.

## ABS REPAIR

Antilock Brake Systems (ABS), or electric brake control modules (EBCM), are a standard feature in most cars produced since the mid to late 1990's. The stopping mechanisms in modern ABS are superior to ordinary brake systems and provide enhanced safety in quick stop situations. Like most car components, ABS need regular maintenance or repairs. At My Auto Solutions, we provide an alternative ABS repair solution to costly dealership service.

If your ABS light is on or your ABS pump is always running, My Auto Solutions could provide you with the service you need. In our workshop, we handle a variety of common ABS issues, including:

- ✓ Wheel sensor fault
- ✓ Pump motor fault
- ✓ Intermediate ABS power loss
- ✓ Missing wheel sensor signals
- ✓ ABS relay codes
- ✓ ABS pump always running
- ✓ And other ABS issues

## AIRBAG MODULE RESET

Air bags are an important safety feature in cars; they protect the driver and front seat passenger from traumatic injury during collisions. When airbags deploy in an accident situation, they rapidly inflate to cushion people in the front seats from colliding with the steering wheel, dashboard, or windows. Keeping functional airbags in your vehicle is crucial for driver safety. If you've been in an accident where your airbags deployed, you may need to get your airbag module reset by My Auto Solutions.

My Auto Solutions supports airbag module reset for all vehicles starting year 1995 and up. At My Auto Solutions, we simplify things for you and your wallet.

Call My Auto Solutions today at 678-228-8422, or visit our online store for more information about the airbag module reset services available. We provide service to all 50 states in USA customers to bring in their airbag module unit as soon as issues arise.

## CLIMATE CONTROL

Climate control is an automobile innovation that keeps cars comfortable all year long, regardless of seasonal and weather changes. Keeping your car at a reasonable temperature is a difficult, continuous job, which is why climate control units sometimes malfunction. At My Auto Solutions, we want customers to have a pleasant and comfortable driving experience. Our skilled team rebuilds climate control computers to keep your vehicle cozy.

My Auto Solutions handles a variety of climate control computer issues in our workshop. Common problems we solve for customers to all 50 states in USA include:

- ✓ Central vents not working
- ✓ Climate control display dark
- ✓ Intermittent climate control power loss
- ✓ AC compressor always running
- ✓ Climate control buttons not working
- ✓ Thermostat stuck
- ✓ And other climate control computer issues

## ENGINE CONTROL MODULE

My Auto Solutions remanufactures ECU, ECM, PCM, and FICM units for customers throughout the metro Atlanta area. Using quality remanufactured parts can save you from costly dealership repairs. Listed below are some common problems we fix on cars from all 50 states in USA:

- ✓ Slow start, rough start, or no start
- ✓ Engine stalls
- ✓ Poor fuel economy
- ✓ Power loss
- ✓ Low voltage on injectors
- ✓ No signals to the ignition coils
- ✓ Misfire in one or more cylinders
- ✓ No communication with car computer
- ✓ Improper or erratic transmission shifts
- ✓ Check engine light on
- ✓ Damage from a failed coil pack

## SEAT BELT REPAIR

Seat belts are crucial to driver and passenger safety; annually they save almost 13,000 lives during car accidents. When a collision happens, it's important that all car safety devices are fully functional to keep occupants safe.

When seat belts are no longer in top condition, they don't perform to the same high, life-saving standard and could malfunction in a car accident. We help customers in all 50 states in USA keep their seat belts in optimal condition with our remanufactured seat belt services. Listed below are some signs that a seat belt needs repair:

- ✓ Seat belt webbing is cut, ripped, chewed, or frayed
- ✓ Seat belt won't lock or unlock
- ✓ Seat belt won't retract
- ✓ Seat belt fits tightly or loosely
- ✓ Seat belt buckle is bent or corroded
- ✓ Seat belt doesn't stay locked

## MILEAGE CORRECTION

Mileage can be incorrectly displayed for a number of reasons; sometimes there's an accident, and sometimes electronics just have issues. At My Auto Solutions, we require that all customers seeking mileage correction services have a legitimate reason for concern, as it is illegal to alter your car's mileage and not disclose that information to potential buyers. Listed below are some common causes of odometer issues:

- ✓ Mileage information incorrect after jump-starting
- ✓ Mileage information incorrect after dashboard damage
- ✓ Electrical fault in dashboard
- ✓ New engine installation
- ✓ Motor of gauge failure
- ✓ Secondhand odometer with miles previously registered
- ✓ Odometer lights flickering or off
